

## Communications Committee - June 4, 2020

- Proposed Ad Hoc Committee evolved from John Merchant's idea of educating residents about our Reservoirs also known as Lake Calero, Lake Chesbro, and Lake Clementia.
- John's proposal includes signage at to be determined areas around the Reservoirs with an emphasis on informing our residents and their guests on the need to protect our water supply and keep it pure.
- In recent weeks we have expanded our VISION to include the following:
  1. To gather and review information relating to the health and quality of the Reservoir water.
  2. To use that information to educate our residents, to re-evaluate and reinforce existing rules and restrictions and to determine any additional actions necessary to protect and improve the quality of our water.

### Committee Organization

Directors Merchant and Butler with the assistance of our Director of Field Operations, Paul Siebensohn, will organize topics for review and will invite representatives from our community groups and knowledgeable individuals to work with us .

We also would especially like the assistance and representation of RMA.

Potential topics in no particular order:

1. Recreation and Reservoirs
2. Wild Life/Environmental Habitat
3. Chemicals
4. Drainage
5. Flow and Pumping
6. Storage
7. History
8. Signage

\*This is a process that will take a little time. We hope when completed we will be able to put together a report/review for all to enjoy and use.

\*If you are interested and knowledgeable about any particular topic please contact John Merchant or Linda Butler at their RMCS D e-mail addresses.

**Discussion and ideas-we need a name for the committee**
