 - (a) if the Successor Parcel is a single-family residential Parcel and the actual total EDUs of such Successor Parcel and all other Successor Parcels to a common Original Parcel are:
 - (i) less than or equal to the Original EDU Assignment for such Original Parcel as shown in Attachment 1, assign as the Maximum Special Tax to such Successor Parcel an amount equal to the product of:

 - times the initial Maximum Special Tax for such Original Parcel as shown on Attachment 1, or
 - (ii) greater than the Original EDU Assignment for such Original Parcel as shown in Attachment 1, assign as the Maximum Special Tax to such Successor Parcel an amount determined by multiplying the actual EDUs for such Successor Parcel times the Maximum Special Tax assigned to the Parcel divided by the number of EDUs assigned to the Parcel in Attachment 1 for the related Original Parcel unless a transfer of EDUs is possible as described in Section (c) below; or
 - (b) if the Successor Parcels are other than single-family residential Parcels, assign as the Maximum Special Tax for each such Successor Parcel an amount equal to the product of
 - (i) the Initial Maximum Special Tax for the related Original Special Tax Area shown in **Attachment 1**; and
 - (ii) a percentage, which is the square footage of the particular Successor Parcel divided by the total square footage for all Successor Parcels to the respective Original Parcel.
 - (c) In the event a final subdivision map for a single-family Parcel will decrease the number of EDUs shown listed on **Attachment 1** for the Original Parcel or a Successor Parcel of the Original Parcel which includes the Parcel proposed for subdivision, the landowner of the Parcel (the "Transferring Parcel") may propose to transfer the excess units to another Parcel (the "Receiving Parcel") or Parcels within the CFD. The proposal to transfer such excess units shall require approval by the Board of an amendment to the EDU assignment to transferring Parcel and a reapportionment of EDUs to the receiving Parcel(s).

The proposed transfer must be approved by the Board for such excess units (or a portion of them) **prior to the recordation of the final sub-division map** for the Receiving Parcel. After this approval, the Finance Officer will make the following adjustments to the records for each of the Parcels:

- (i) The number of EDUs and the Maximum Special Tax liability associated with the transferred EDUs to the Receiving Parcel(s) shall be reassigned to the Receiving Parcel,
- (ii) The number of EDUs and the amount of the Maximum Special Tax liability for the Transferring Parcel shall be reduced by the amount of the Maximum Special Tax assumed by the Receiving Parcel(s) as a result of such transfer.
- (iii) If only a portion of the excess EDUs can be transferred to a Receiving Parcel(s), then the Maximum Special Tax liability associated with the reduced number of EDUs will be reallocated to the remaining EDUs of the transferring Parcel.

III. Escalation Factor

The Maximum Special Tax for Parcels assigned to a Phase II Improvements Group will include an escalation factor. This escalation factor will increase the initial Maximum Special Tax shown in **Attachment 1** at an annual rate of 7.5%. The escalation rate will only apply to the portion of the Maximum Special Tax that is used for the Phase II Improvements Annual Cost Group. Following the issuance of the special tax bonds for the Phase II improvements, the Maximum Special Tax rate for Phase II improvements will cease being increased by the escalation rate in the fiscal year where the Special Tax Revenues produced by the Maximum Special Tax exceeds the Annual Costs by a 10% coverage ratio.

IV. Apportionment, Levy And Collection Of Special Taxes.

A. Immediately following the assignment of the Maximum Special Tax for each Taxable Parcel as provided in subsection B of Section II above, the Finance Officer shall cause the Special Taxes to be apportioned and levied in each Fiscal Year as follows:

- 1. For Tax-Exempt Parcels, no Special Tax shall be apportioned or
- levied.
 - 2. For Taxable Parcels, proceed as follows:
 - (i) Compute the Annual Costs for such Fiscal Year.
 - (ii) Allocate the Annual Costs from i) to the Annual Cost Groups based on the percentage of total bond proceeds for all outstanding bonds issued

by the CFD to fund the items defined for each Annual Cost Group as determined from the Official Statement for each bond issue and the percentage of Annual Costs for pay-as-you-go expenditures attributable to each Annual Cost Group. If debt service for a bond issue is not included in the Annual Costs for the Fiscal Year, then the bond proceeds should not be included in the calculation.

- (iii) Calculate the Maximum Special Tax revenue for each Annual Cost Group identified in **Attachment 1**, by adding the Maximum Special Tax for each Parcel subject to the tax for each such Annual Cost Group shown in **Attachment 1**.
- (iv) For each Annual Cost Group determined in ii), divide the Annual Costs assigned in (ii) by the Maximum Special Tax revenue calculated in iii) above to determine the ratio of Annual Costs to the Maximum Special Tax revenue.
- (v) For each Parcel, calculate the Special Tax for each Annual Cost Group by multiplying the ratio determined in iv) for such group by the Maximum Special Tax assigned to the Parcel calculated in II.B.3.
- (vi) Levy on each Taxable Parcel the sum of the Special Taxes calculated for each Annual Cost Group in v).
- 3. Prepare the Tax Collection Schedule for each Parcel and send it to the Auditor of the County of Sacramento requesting that it be placed on the general, secured property tax roll for the following Fiscal Year. The Tax Collection Schedule shall be sent not later than the date required by the Auditor for such inclusion.
- B. Collection of the Special Taxes shall be by the County of Sacramento in the same manner as ordinary *ad valorem* property taxes are collected. They shall be subject to the same penalties and the same lien priority in the case of delinquency as *ad valorem* taxes. The Special Taxes shall be collected only so long as required to pay the Annual Costs.

The District shall make every effort to correctly assign the number of EDUs and calculate the Special Tax for each Parcel. It shall be the burden of the taxpayer to correct any errors in the determination of the Parcels subject to the tax and their Special Tax.

V. Prepayment of Special Tax

A landowner may satisfy the Special Tax obligation on any Parcel in one of the following two ways:

A. Prior to the Bond Sale, a landowner may prepay the facility costs allocated to a Parcel up to 30 days prior to the sale of the first series of Special Tax bonds. The amount of such prepayment would be determined as follows:

- Step 1: Determine the facility cost allocation for a given Parcel as shown in **Attachment 1**.
- Step 2: Add to the facility cost allocation any fees or expenses incurred by the District in connection with the prepayment calculation or the proceeds of the prepayment.
- Step 3: Add to the facility cost allocation a proportional share of the CFD formation costs not associated with the issuance of bonds.

The proceeds of the prepayment shall be used to construct authorized CFD facilities, thereby reducing the total amount of bonds and the Annual Costs.

- B. After the sale of Bonds, landowners may permanently satisfy the Special Tax obligation by a cash settlement with the District as permitted under Government Code Section 53344. Prepayment is permitted only under the following conditions:
 - The District determines that the prepayment of the Special Tax obligation does not jeopardize its ability to make timely payments of debt service on outstanding bonds.
 - Any landowner prepaying the Special Tax obligation must pay any and all delinquent special taxes and penalties prior to prepayment.

The prepayment amount shall be established by the following calculation:

- Step 1: Determine the Maximum Special Tax for the Parcel based on the assignment of the Maximum Annual Special Tax described in Section 5 above.
- Step 2: Reduce the Maximum Special Tax by the 10 percent delinquency coverage factor and add back the average annual tax delinquency rate for property in the CFD. If no delinquency history has been established for the Special Tax, add back to the annual Special Tax the most recent five-year average annual delinquency rate for secured property taxes in the County as a whole. The Maximum Special Tax may be reduced still further if all bonds of the CFD have been issued and the future debt service, through the maturity of all outstanding bonds, is known with certainty, except that the tax shall not be reduced below the amount determined necessary to pay Annual Costs.

- Step 3: Calculate the revenue produced by the Maximum Special Tax from the date of prepayment up to and including the last maturity date of outstanding bonds based on the tax determined in Step 2. If all bonds of the CFD have not yet been issued, for the purpose of this calculation the final bond issue of the CFD shall be assumed to mature in 2020, except that this assumed final maturity date may be amended by the District no later than the time of the calculation of the prepayment.
- Step 4: Calculate the present value of the annual revenue stream determined in Step 3. The present value shall be calculated using that discount rate which, when the prepayment is invested in approved investments (as specified by the resolution authorizing the issuance of bonds) earning a rate of interest equal to the discount rate, would produce annual revenues equal to the amounts calculated in Step 3. The discount rate may not exceed the bond yield as determined by the Tax Reform Act of 1986, as may be amended.
- Step 5: Determine the prepayment amount by adding to the present value calculated in Step 4 any fees or expenses incurred by the City in connection with the prepayment calculation or the application of the proceeds of the prepayment.

The proceeds of the prepayment may be applied by the District in its discretion by one of the following methods:

- a) As an annuity over the remaining life of outstanding bonds, for the payment of debt service, annual expenses of the CFD, and anticipated direct expenditures for facilities. The annuity must be handled in such a fashion as not to cause the bonds to become arbitrage bonds under the Tax Reform Act of 1986, as may be amended.
- b) To call bonds as provided for in the resolution authorizing the issuance of bonds by the CFD. If this is the preferred use of the prepayment, the calculation of the prepayment amount as described above in Steps 1-5 shall include an allowance for the payment of redemption premiums and expenses as required.
- c) To be applied in full to the next annual Special Tax levy, provided that by doing so the District's ability to make timely payments of debt service in subsequent years is not jeopardized. This method may be used if the amount of the prepayment is such that its application to methods (a) or (b) would be inefficient or burdensome for the District, as determined by the Finance Officer or designee.
- d) To be applied in full to the acquisition or construction of facilities that otherwise would have been financed with bonds issued by the CFD, so as to reduce the amount of bonds actually issued by the CFD.

VI. Administrative Changes

The Finance Officer or designee has authority to make necessary administrative adjustments to the Rate and Method of Apportionment in order to remedy any portions of the Special Tax formula that require clarification.

Any taxpayer who feels that the amount or formula of the Special Tax is in error may file a notice with the Finance Officer appealing the levy of the Special Tax. The Finance Officer will then promptly review the appeal, and if necessary, meet with the applicant. If the findings of the Finance Officer verify that the tax should be modified or changed, a recommendation at that time will be made to the Board and, as appropriate, the Special Tax levy shall be corrected in a manner determined by the Finance Officer.

Interpretations may be made by Board for purposes of clarifying any vagueness or ambiguity as it relates to the Special Tax rate, the method of apportionment, the classification of properties or any definition applicable to the CFD.

- (2) If either the Geyer and/or RM Country Club properties are included, provisions have been made in the special tax formula for a reallocation of the costs, a reduction of the special tax for all parcels, and the assignment of the special tax shown for either of these two parcels.
